Nicole -

Here's what Carter sent me last week. The actual briefing presentation is the 2nd attachment (PowerPoint). I discussed with him the outcome of our meeting with Alexis last Friday and he is making revisions, accordingly. He and I are scheduled to meet at 1pm today to go over the revisions and any other last minute preparations needed. We'll need to figure out how to address the new info from the Save the Scenic Santa Ritas/CBD letter that Alexis forwarded late Friday.

-Kathy

Subject: Draft Rosemont briefing presentation

Hi Kathy,

Attached is my draft Rosemont briefing presentation up through the point that I felt capable of doing without further input on recommended next steps from Alexis. I recommend we also share the project timeline document that CEQ helped to create. It is long and thorough, but I think that just helps to underscore the amount of time and interagency collaboration that has taken place. I would also recommend that we send the "EPA Issues" document CEQ generated. Again, it is overly long for a briefing paper, but it is a thorough description of the issues from EPA's perspective and it has been vetted by CEQ and reviewed by the other federal partners.

I have also attached a number of figures that might make useful handouts to give a lay of the land for Rob.

Let me know what you think and then I can continue to revise and refine.

-Carter
